

Deep Penetrating Concrete Moisture Control

ARMIDEX MOISTURE CONTROL & HARDENER

Armidex MCH is a deep penetrating product designed to control moisture and harden Portland based concrete. It's a simple to apply and cost effective solution to increase the quality of the finished product and extend the life of the slab by reducing likelihood of shrinking, curling, spalling, cracking, and other issues due to rapid moisture loss.

- Controls moisture
- Penetrates and hardens concrete
- Apply to new or existing slabs
- Use before staining or coating
- Zero VOC's and non-toxic
- Stain and abrasion resistant
- Cracking reduction
- Earth friendly
- Permanent and simple to apply
- Made in USA

ARMIDEX MCH+C

Also available with added curing agent for new concrete.
